A. Model parametrization

B. STM inputs

C. Simulations

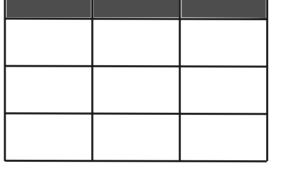

Proxy of the states prevalence

in the neighbors for each plot location

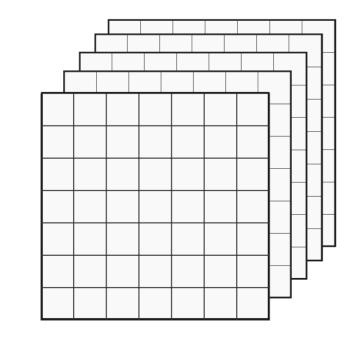

State Distribution Model

(RandomForest)

120 initial landscapes (10 by set of parameters) at the equilibrium with the climatology 1970-2000

12 set of parameters selected by likelihood

23 GCMs 2015-2095 (RCP 8.5, AR5). Windows averaging on the past 15 years
